$$1. \frac{58}{28} - \frac{5}{4} = \frac{58}{28} - \frac{5 \times 7}{4 \times 7} = \frac{58}{28} - \frac{35}{28} = \frac{58 - 35}{28} = \frac{23}{28}$$

$$2. \frac{2}{8} + \frac{5}{56} = \frac{2 \times 7}{8 \times 7} + \frac{5}{56} = \frac{14}{56} + \frac{5}{56} = \frac{14 + 5}{56} = \frac{19}{56}$$

$$3. \frac{8}{4} + \frac{11}{28} = \frac{8 \times 7}{4 \times 7} + \frac{11}{28} = \frac{56}{28} + \frac{11}{28} = \frac{56 + 11}{28} = \frac{67}{28}$$

$$4. \frac{79}{18} - \frac{4}{2} = \frac{79}{18} - \frac{4 \times 9}{2 \times 9} = \frac{79}{18} - \frac{36}{18} = \frac{79 - 36}{18} = \frac{43}{18}$$

$$5. \frac{9}{6} - \frac{20}{36} = \frac{9 \times 6}{6 \times 6} - \frac{20}{36} = \frac{54}{36} - \frac{20}{36} = \frac{54 - 20}{36} = \frac{34}{36}$$

$$6. \frac{3}{24} + \frac{2}{4} = \frac{3}{24} + \frac{2 \times 6}{4 \times 6} = \frac{3}{24} + \frac{12}{24} = \frac{3 + 12}{24} = \frac{15}{24}$$

$$7. \frac{9}{3} + \frac{5}{21} = \frac{9 \times 7}{3 \times 7} + \frac{5}{21} = \frac{63}{21} + \frac{5}{21} = \frac{63 + 5}{21} = \frac{68}{21}$$

$$8. \frac{22}{9} - \frac{5}{3} = \frac{22}{9} - \frac{5 \times 3}{3 \times 3} = \frac{22}{9} - \frac{15}{9} = \frac{22 - 15}{9} = \frac{7}{9}$$

$$9. \frac{3}{6} - \frac{14}{66} = \frac{3 \times 11}{6 \times 11} - \frac{14}{66} = \frac{33}{66} - \frac{14}{66} = \frac{33 - 14}{66} = \frac{19}{66}$$

$$10. \frac{6}{3} + \frac{13}{24} = \frac{6 \times 8}{3 \times 8} + \frac{13}{24} = \frac{48}{24} + \frac{13}{24} = \frac{48 + 13}{24} = \frac{61}{24}$$

$$11. \frac{12}{18} + \frac{7}{6} = \frac{12}{18} + \frac{7 \times 3}{6 \times 3} = \frac{12}{18} + \frac{21}{18} = \frac{12 + 21}{18} = \frac{33}{18}$$

$$12. \frac{75}{70} - \frac{2}{7} = \frac{75}{70} - \frac{2 \times 10}{7 \times 10} = \frac{75}{70} - \frac{20}{70} = \frac{75 - 20}{70} = \frac{55}{70}$$
