

EX 1 Simplifier les fractions suivantes au maximum.

1. $\frac{4}{10} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{32}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{20}{35} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{30}{36} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{12}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{44}{55} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{18}{45} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{50}{80} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{35}{56} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{2}{6} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{63}{90} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{27}{30} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{7}{70} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{4}{36} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{36}{63} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{11}{44} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{7}{70} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{8}{12} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{30}{36} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{15}{50} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{48}{56} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{70}{80} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{10}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{2}{18} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{15}{24} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{11}{77} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{70}{90} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{4}{16} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{77}{88} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{24}{32} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{15}{18} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{4}{32} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{55}{99} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{36}{63} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{8}{28} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{24}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{40}{64} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{3}{24} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{99}{110} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{9}{54} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

**EX**
1

Simplifier les fractions suivantes au maximum.

1. $\frac{8}{48} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{5}{15} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{18}{21} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{10}{18} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{22}{55} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{9}{63} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{4}{8} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{12}{54} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{24}{42} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{35}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{3}{12} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{6}{9} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{9}{21} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{54}{63} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{14}{21} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{35}{50} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{35}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{4}{16} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{33}{88} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{9}{12} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

EX 1 Simplifier les fractions suivantes au maximum.

1. $\frac{45}{81} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{8}{20} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{90}{100} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{77}{88} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{12}{20} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{24}{56} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{54}{60} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{45}{54} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{4}{16} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{24}{56} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{50}{90} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{18}{45} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{12}{16} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{22}{99} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{10}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{24}{80} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{49}{70} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{20}{70} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{5}{15} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{22}{33} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{30}{35} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{12}{16} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{21}{49} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{50}{60} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{11}{22} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{6}{27} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{36}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{63}{90} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{2}{16} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{11}{55} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{18}{27} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{45}{50} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Simplifier les fractions suivantes au maximum.

1. $\frac{2}{6} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{24}{42} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{2}{8} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{24}{56} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{36}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{70}{80} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{21}{49} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{6}{24} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{30}{50} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{36}{42} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{77}{88} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{15}{35} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{45}{72} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{5}{15} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{8}{72} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{30}{50} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{25}{30} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{10}{90} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{8}{32} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{16}{40} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Exercice 1 : Simplifier les fractions suivantes au maximum.

1. $\frac{22}{77} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $\frac{15}{20} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $\frac{12}{14} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $\frac{3}{12} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

EX
1

Simplifier les fractions suivantes au maximum.

1. $\frac{22}{55} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

1. $\frac{36}{40} = \frac{4 \times 9}{4 \times 10} = \frac{9}{10}$

2. $\frac{70}{80} = \frac{10 \times 7}{10 \times 8} = \frac{7}{8}$

3. $\frac{21}{49} = \frac{7 \times 3}{7 \times 7} = \frac{3}{7}$

4. $\frac{6}{24} = \frac{6 \times 1}{6 \times 4} = \frac{1}{4}$

EX

1

1. $\frac{30}{50} = \frac{10 \times 3}{10 \times 5} = \frac{3}{5}$

2. $\frac{36}{42} = \frac{6 \times 6}{6 \times 7} = \frac{6}{7}$

3. $\frac{77}{88} = \frac{11 \times 7}{11 \times 8} = \frac{7}{8}$

4. $\frac{15}{35} = \frac{5 \times 3}{5 \times 7} = \frac{3}{7}$

EX

1

1. $\frac{45}{72} = \frac{9 \times 5}{9 \times 8} = \frac{5}{8}$

2. $\frac{5}{15} = \frac{5 \times 1}{5 \times 3} = \frac{1}{3}$

3. $\frac{8}{72} = \frac{8 \times 1}{8 \times 9} = \frac{1}{9}$

4. $\frac{30}{50} = \frac{10 \times 3}{10 \times 5} = \frac{3}{5}$

EX

1

1. $\frac{25}{30} = \frac{5 \times 5}{5 \times 6} = \frac{5}{6}$

2. $\frac{10}{90} = \frac{10 \times 1}{10 \times 9} = \frac{1}{9}$

3. $\frac{8}{32} = \frac{8 \times 1}{8 \times 4} = \frac{1}{4}$

4. $\frac{16}{40} = \frac{8 \times 2}{8 \times 5} = \frac{2}{5}$

EX

1

1. $\frac{22}{77} = \frac{11 \times 2}{11 \times 7} = \frac{2}{7}$

2. $\frac{15}{20} = \frac{5 \times 3}{5 \times 4} = \frac{3}{4}$

3. $\frac{12}{14} = \frac{2 \times 6}{2 \times 7} = \frac{6}{7}$

4. $\frac{3}{12} = \frac{3 \times 1}{3 \times 4} = \frac{1}{4}$

EX

1

1. $\frac{22}{55} = \frac{11 \times 2}{11 \times 5} = \frac{2}{5}$

2. $\frac{30}{54} = \frac{6 \times 5}{6 \times 9} = \frac{5}{9}$

3. $\frac{56}{80} = \frac{8 \times 7}{8 \times 10} = \frac{7}{10}$

4. $\frac{8}{28} = \frac{4 \times 2}{4 \times 7} = \frac{2}{7}$
